

**CHOOSE NOVASOURCE TO HELP GUARD YOUR ALFALFA STAND FROM WEEDS AND GRASSES.**

**Protect your alfalfa crop, increase longevity of the stand and improve the quality at harvest with the proven portfolio of NovaSource® weed control solutions.**

Agricultural Herbicide

Apply on dormant, established stands to manage weeds and grasses with the highly effective, proven mode of action, hexazinone (Group 5).

Agricultural Herbicide

Agricultural Herbicide

The one-two herbicide punch of hexazinone and diuron (Group 7) enhances herbicidal activity in two different ratios.

Agricultural Herbicide

Your product of choice for late-season grass control. Provides excellent residual herbicide control (Group 12) for tough grasses and broadleaf weeds. Can be applied during dormancy, between cuttings and on young established alfalfa.

Agricultural Herbicide

Apply on dormant established stands to provide a base of protection and long residual control of more than 60 broadleaf weeds – even herbicide resistant species. Not registered in California and Canada.

**ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS.**
